

## Quiz: User Interface Fundamentals

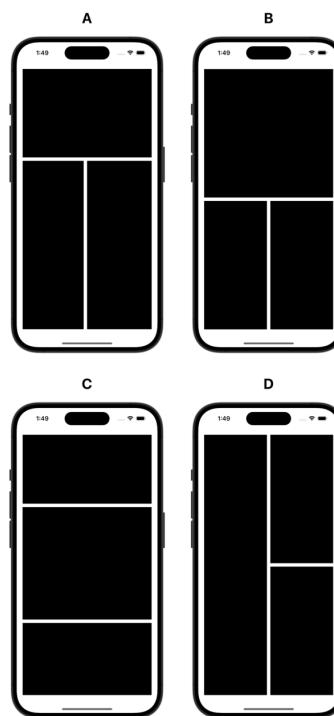

1. The following code will produce which layout shown at right? (circle one)

```
struct ContentView: View {  
    var body: some View {  
        VStack {  
            Rectangle()  
            HStack {  
                Rectangle()  
                Rectangle()  
            }  
        }  
    }  
}
```

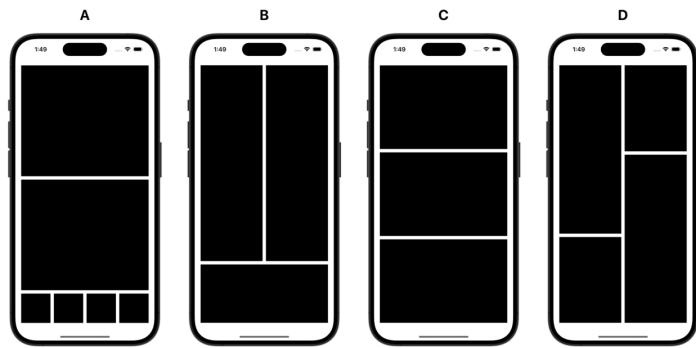

2. The following code will produce which layout shown at right? (circle one)

```
struct ContentView: View {  
    var body: some View {  
        HStack {  
            Rectangle()  
            VStack {  
                Rectangle()  
                Rectangle()  
            }  
        }  
    }  
}
```

3. The following code will produce which layout shown below? (circle one)

```
struct ContentView: View {  
    var body: some View {  
        VStack {  
            HStack {  
                Rectangle()  
                Rectangle()  
            }  
  
            Rectangle()  
                .containerRelativeFrame(.vertical, count: 10, span: 3, spacing: 0)  
        }  
    }  
}
```

4. Define what a *protocol* is in Swift using one sentence. Then, explain what it means for a structure to *conform* to a protocol.

5. What is the difference between HStack, VStack, and ZStack?
